

QUIXTAR INC

1 Prospects would have to wait seven days after receiving disclosures before they could register.

Solution: Normally the prospects are shown the business plan and if they are interested in the business, they got registered, and the dependency of time factor registering in the business will depend on the prospects perception. Some prospects registered right away and some prospects takes time based upon the excitement of the prospect and even the belief of the prospect. Nobody forces the prospects to join in the business.

Even the Quixtar had got the new policy called 6 months back guarantee after the prospect registers as business owner, if the prospect not interested in the business opportunity due to any particular reason, they always can return the material what he took from the business owner whoever showed the business opportunity.

So waiting seven days time for registering in the business opportunity after getting the disclosures will not be the right approach and second thing is the everymonth business owners will keep certain goals to reach goals and based upon goals business owners gets paid bonus cheques. This whole process gets delayed and as this businees is best business to earn very good secondary income or replacing the primary source income which can help comman man to start his business with very little amount and build big way and become financially free.

2 You would be required to give every prospect a list of "references" – the names, addresses, and phone numbers of 10 other IBOs in the area – seven days before the prospect registers. This requirement would infringe on the privacy of every IBO whose name, address, and phone number was provided to prospects. It would also penalize the sponsor, who would be required to give his prospect contact information for 10 other IBOs, any of whom might be happy to register the prospect themselves.

Solution: Ideally the idea which can given by FTC never works out, but currently this is the way , it was happening, as soon as prospect joins in the business, in period of one 1 to 2 weeks, prospect's sponsor introduces him to 10 successful IBO's in different associations which gets the belief to the prospect that he can also build the businessas part time.

Just giving the contacts of 10 refernce IBO's cannot work out and no use for the prospect as soon as he joins the business, and will not make any difference to the prospect if we give 10 references because just talking on the phone with 10 refernce IBO's will not help prospect to any level. This business is purely performance based and anybody can reach to the top levels with in short span of years with hard work and focus. This is the best business as this is people helping people business.

3 You would have to give every prospect a list of all lawsuits, arbitrations, and other legal claims for the past 10 years involving Quixtar and its IBOs where the plaintiff alleged fraud, misrepresentation, or unfair trade practices – regardless of whether or not the accusation was true. Among other problems, this requirement would open up Quixtar and other legitimate companies to false accusations. Meanwhile, dishonest companies would simply ignore the rule.

Solution: This is the business opportunity which anybody can work hard and follow all the rules and regulations can build the business can grow to the top levels in the business, we cannot consider few lawsuits and arbitrations which are filed by the people will not help any body, because as this is the people's business depends on person to person how their perception and belief, confidence level is. We cannot impose of some body not doing the business in right way and filing the lawsuit against the business will not help the person who is ready to do the hardwork and build the business. So the suggestion given by FTC cannot be considered.

4 You would have to make a different disclosure for every income claim. This would include any examples you might use during an opportunity presentation to illustrate how the Plan works.

Solution: Incomes are dependant on person to person ability and work hard, So always average incomes are shown. Some people who works hard may get more and some who do not hard that much may get less, Always anybody who works hard should get the more which is universal law in any field and which applies same law in Quixtar Income also which is purely performance based. So Suggestion given by FTC cannot be accepted.

5 You would be required to provide prospects with personal financial documents to back up ("substantiate") any income claim.

Solution: personal Financial documents are private not public in any field which cannot be shown to the prospects. If Person A shows the palm to person B, and if the person B get excited and he joins to build the business under person A, person B can make more money in the business than person A if the person B choose too. So Showing the personnal Financial statement will not help in this business because business is purely performance based and not pyramid.
